

The real cost of one bad hire

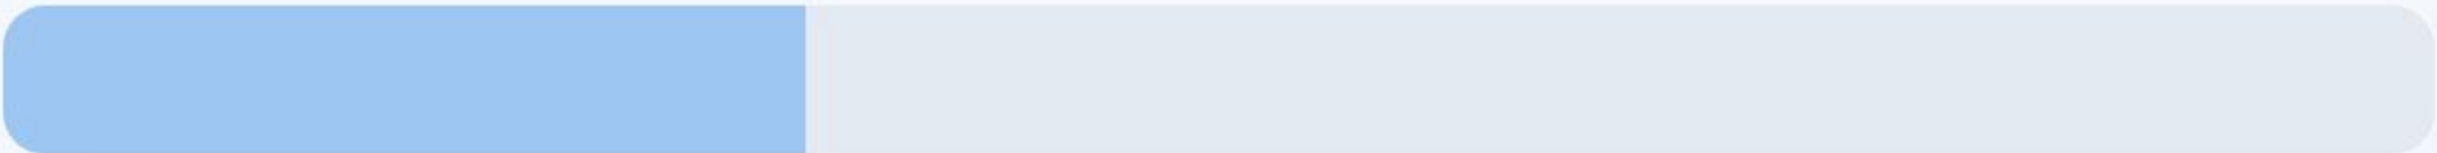

See the math →

Cost driver 1 of 3

Recruiter + manager hours

The hours your team already spent – sourcing, screening, interviewing – gone.

Cost adding up...

Recruiter + manager hours

Ramp-up + lost productivity

Backfill + re-hire cost

Cost driver 2 of 3

Ramp-up + lost productivity

Weeks of half-speed output while the wrong hire ramps up, then stalls.

Cost adding up...

Recruiter + manager hours

Ramp-up + lost productivity

Backfill + re-hire cost

Cost driver 3 of 3

Backfill + re-hire cost

Re-opening the role, re-advertising, re-interviewing.
You pay the whole bill twice.

Cost adding up...

Recruiter + manager hours

Ramp-up + lost productivity

Backfill + re-hire cost

The total

= up to 6 months of that role's salary.

Before you count the hit to team morale and momentum. Most bad hires trace back to one thing – shortlisting on gut, not data.

6mo

of salary – wasted on a hire that didn't fit.

De-risk it with **AI matching**

- Every candidate ranked by real fit
- Shortlist on data, not gut
- Fewer mis-hires, lower cost
