How to read a JD like a recruiter

Swipe →

1

Split must-haves from nice-to-haves

Half a JD is a wishlist. Find the 3–4 non-negotiables — that's what they screen for.

MUST-HAVES — SCREENED FOR

✓ 2+ yrs in the core skill

✓ Owns the key deliverable

NICE-TO-HAVES — FLEXIBLE

○ "Rockstar", "ninja", "guru"

○ A long wishlist of tools

2

Decode the real role

Look past buzzwords to the outcome. What problem are you hired to solve?

Buzzwords → one real outcome

3

Mirror their keywords

Use their words for your skills — that's how you get matched, not filtered out.

THEIR JD SAYS

"data analysis"

=

YOUR PROFILE SAYS

Data analysis

"stakeholder comms"

=

Stakeholder comms

"project ownership"

=

Project ownership

Match, don't spray.
