

FOR JOB SEEKERS • GY SKILL

Nobody's hired for "hardworking & passionate."

Across every sector the same handful of skills keep coming up — and most aren't taught in college. The 5 that move the needle in 2026 📌

THE ONES THAT KEEP COMING UP

1 **Clear communication**

Not fancy words — being understood the first time.

2 **Basic data literacy**

Read a sheet, spot a trend, ask the right question.

 **'47 certificates' is a myth. Depth in a few beats badges in many.**

THE ONES THAT SET YOU APART

3 🤖 **AI tools**

Use them daily. 'I don't touch AI' now reads as a red flag.

4 🎯 **Ownership**

Do what you said you'd do — without a reminder.

💡 **Managers re-hire reliability faster than raw talent.**

THE ONE THAT COMPOUNDS

5 ⚡ **Learning speed**

Beats what you already know — every role changes fast.

The good news: every one of these is learnable — fast.

You don't need a new degree. You need the right 5 reps.
