BEFORE ANY HUMAN SEES IT

Your resume goes through security first.

it's called an ATS.
swipe for the scan →

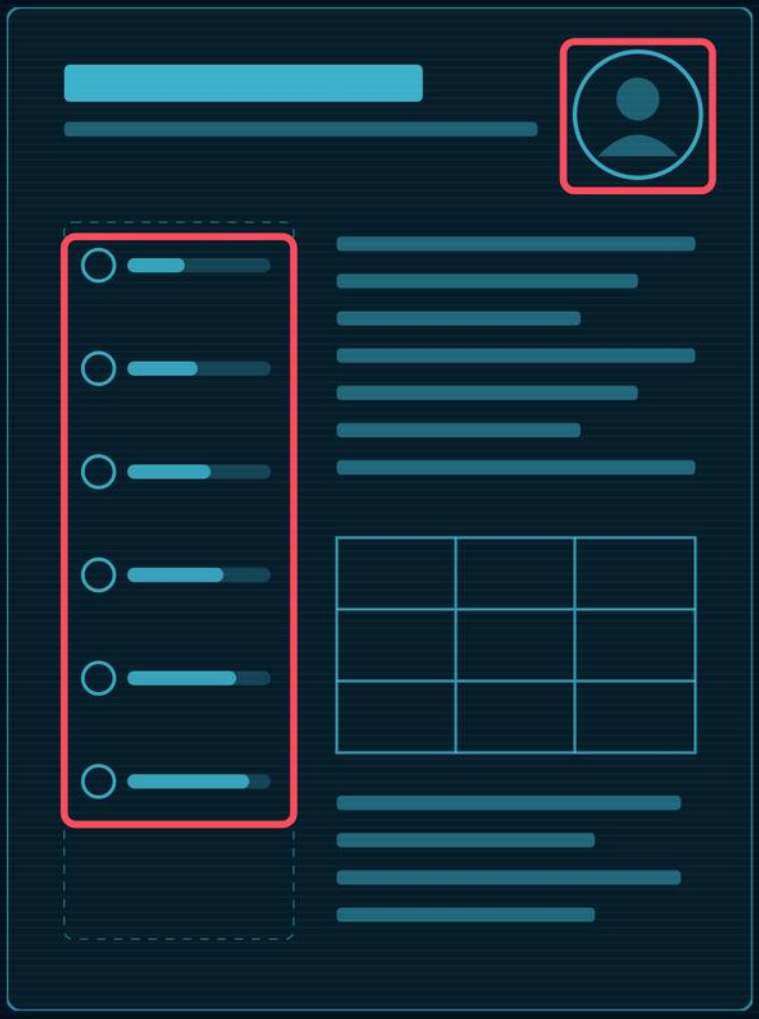

Flag 01

Tables, columns and text boxes

The software reads across them, so your experience comes out jumbled or goes missing.

Flag 02

Photos, icons and skill bars

They look smart to you. To the ATS they're blank space, so the skills inside them never get counted.

Flag 03

Words the job didn't ask for

If the job says **"inventory planning"** and you wrote **"stock management"**, you may not match at all.

FREE

Scan yours before you apply.

See your resume the way the ATS sees it, get a score, and fix what it flags.
