
CAREERS ABROAD · JAPAN
Engineers are learning Japanese for this.
Tokyo. 7 a.m.
here's what it actually takes →
1/5 →

STEP 01 · THE LANGUAGE

Learn Japanese first.

Most of these jobs need a basic Japanese test: **JLPT N4** or the **JFT-Basic**. It takes months, not weeks, so start early.

STEP 02 · THE SKILL TEST

Then prove your skill.

Each field has its own skills exam. Hands-on site and shop-floor experience counts here.

GroYouth

STEP 03 · THE ROUTE

Then you fly.

With both tests and a job offer from a Japanese employer, you can go on Japan's **Specified Skilled Worker** visa: construction, manufacturing, nursing care and more.

GroYouth

Japan openings, as they come in.

We share overseas roles on GroYouth along with jobs across India. Follow so you see the next one first, and tag a friend who's learning Japanese.
